October 2009

BOILER TEST and INSPECTION SEMINAR

The Federation will be joining with the Northern Association of Model Engineers in presenting a Boiler Test and Inspection Seminar, which will be of interest to Society Boiler Testers.

Mr Chris Deith has kindly offered his facilities at "The Fosse" as the venue, and the Seminar will be held on the 24th April 2010.

It is anticipated that the Seminar will cover the background to the legislation, the "Blue Book", boiler testing, including a practical demonstration, paperwork and responsibilities wrt design and construction. There will also be a "rogues gallery" of hardware.

Applications for places should be made to the Secretary for collation and onward transmission by the end of January 2010. It is suggested that a maximum of two delegates should attend from interested societies.

(Ivan Hurst, Secretary, Southern Federation of Model Engineering Societies)

Please reserve places for the Joint Boiler Test Seminars.
